Shahrukh Altaf

+97430197084 | shahrukhaltaf123@gmail.com | Doha, Qatar

Summary

Full-Stack Software Engineer with 3+ years of experience building scalable web and mobile applications across software house and product-based environments. Specialized in Next.js, React.js, React Native, Node.js, and PostgreSQL, with strong expertise in developing high-performance user interfaces and RESTful APIs. Proven ability to deliver end-to-end solutions, from UI/UX design to backend development and production deployment on VPS environments. Experienced with modern tools including React Query, Prisma ORM, and Tailwind CSS for building efficient and maintainable systems. Based in Doha with transferable visa and immediate availability.

Skills

- **Frontend**: React.js, Next.js, TypeScript, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, PostgreSQL
- **State Management:** React Query, Redux Toolkit
- **Tools & Infrastructure:** Git Version Control, Linux VPS, CI/CD Pipelines, Nginx Server
- **Mobile Apps:** React Native, Android (Java)

Experience

Timeslink | Dubai, UAE
Full-Stack Software Engineer | 07/2025 - 01/2026

- Led end-to-end development of a production-grade web application, from Figma-based design to deployment
- Built scalable full-stack system using Next.js, React.js, and Tailwind CSS
- Developed REST APIs with Prisma ORM and PostgreSQL for efficient data handling
- Implemented secure authentication with Google Auth and role-based access
- Designed real-time dashboard using React Query for optimized data flow
- Deployed and maintained application on VPS, handling server configuration and production setup
- Delivered multi-language support (English, Russian) for international users

Hans Logistics FZE | Dubai, UAE
Frontend Developer | 03/2022 - 04/2024

- Developed and maintained multi-vendor web applications within a collaborative development team
- Built scalable React.js interfaces using React Query integrated with REST APIs
- Converted Figma designs into responsive UI using Flexbox and Grid layouts
- Implemented complete storefront features including product listings and dashboards
- Collaborated with backend teams for API integration and data consistency
- Contributed to backend development using Node.js and Express.js in later phase

Pearlcom Softwarehouse | Rawalpindi, Pakistan
Junior Java Developer | 09/2018 - 08/2019

- Developed Android applications using Java with focus on UI/UX design
- Designed mobile interfaces using Adobe Illustrator based on client requirements
- Implemented interactive UI components and screen animations
- Built educational mobile application integrated with Firebase backend
- Collaborated within cross-functional team to deliver client projects

Projects

Timeslink Logistics (Tracking Platform)

Jul 2025 – Present
https://timeslinklogistics.com/en

- Built a full-stack logistics tracking platform with a real-time dashboard for monitoring shipments and operations.
- Built using Next.js, React Query, Prisma ORM, and PostgreSQL, ensuring scalable and efficient data handling.
- Implemented secure Google Authentication, restricting dashboard access to authorized admin users only.

- Designed and developed admin dashboard features, including blog management and full CRUD operations.
- Created responsive landing pages and marketing website, supporting global logistics business operations.

VocabUp — Vocabulary Builder

Jan 2025 – Present
https://vocabup.codesbyshahrukh.online/

- Built a responsive vocabulary learning web application designed for non-native English speakers.
- Implemented flashcard-based learning system with progress tracking and mistake analysis features.
- Used Redux Toolkit for state management, enabling efficient handling of vocabulary data and user progress.
- Designed an engaging game-like learning experience, improving user interaction and retention.

QuickMart — Instant Order Store

Sep 2024 – Present
https://quick-mart.codesbyshahrukh.online/

- Built a frictionless e-commerce platform allowing users to place orders without account registration.
- Built using Next.js and React Query, optimizing server-state management and performance.
- Designed and implemented admin dashboard with Google Authentication, enabling secure product and order management.
- Created advanced product management system, supporting variations (size, color, attributes) and bulk operations.
- Focused on user-centric design, simplifying the ordering process for faster customer conversion.

Education

Iqra University | Islamabad, PAK
Bachelor of Science in Computer Science | 11/2021
Iqra University — Islamabad, Pakistan

Languages

English, Urdu, German, Arabic

Certificates

- Udemy: The Ultimate React Course 2025: React, Next.js, Redux & More
- freeCodeCamp: Front End Development Libraries
